Summary

Software Development Engineer with over three years of experience in backend development, microservices, and distributed systems. Skilled in Java, Kotlin, and Spring Boot with expertise in designing cloud-native, event-driven architectures for high-performance fintech platforms. Experienced in scaling real-time systems, optimizing reliability, and delivering impactful solutions in agile, product-based environments.

Technical Skills

Languages: Java, Kotlin, Python (working knowledge), SQL

Frameworks & Tools: Spring Boot, JUnit, Mockito, MySQL, PostgreSQL, Flyway, Liquibase, Kafka, SQS, Redis, Docker, Kubernetes, AWS, Git, Bitbucket

Core Strengths: Backend Development, Microservices Architecture, Distributed Systems, Event-Driven Architecture, System Design, REST API Design, Cloud-Native Applications, Payments & Fintech Systems

Experience

SDE I, NIUM – Mumbai, India Aug 2025 – present

- Architected a Bulk Transaction API supporting 1,000 transactions per request with sub-3-second response using asynchronous acknowledgment, job scheduling for future-dated processing, and real-time webhook notifications.
- Enhanced a core module of the Cross-Border Payout System by fixing defects and improving real-time international transaction flows while ensuring PCI DSS and regulatory compliance. Optimization efforts improved throughput and reduced incident resolution time by 5%.
- Technologies:** Java, Spring Boot, PostgreSQL, Liquibase, SQS, Redis, Docker, Kubernetes, AWS

Deputy Manager / SDE I, Axis Bank Ltd. – Mumbai, India Aug 2022 – July 2025

- Outward Remittance Platform:** Engineered and scaled a distributed payments platform enabling secure international fund transfers and global stock investments for customers in India.
- Developed 20+ high-performance APIs integrating fintech partners such as Groww, INDmoney, and Vested, driving a 30% increase in adoption and reducing transaction failures by 15%.
- Technologies:** Java, Kotlin, Spring Boot, MySQL, Flyway, Kafka, Redis, Docker, Kubernetes, AWS
- Dormancy Management Plugin:** Designed an automation plugin to deactivate inactive accounts after 15 days, saving INR 50 lakh annually and reducing manual intervention by 80%.
- Built a Kotlin/Spring Boot microservice connecting to multiple relational databases, generating structured CSV reports, and uploading them securely to SFTP for downstream processing.
- Technologies:** Kotlin, Spring Boot, Docker, Kubernetes, AWS
- Transaction Processing Plugin:** Modernized transaction workflows by developing a Spring Boot plugin bridging 10+ legacy .NET applications with IBM MQ, improving throughput by 10% and reducing errors by 20%.
- Delivered asynchronous communication via REST APIs and webhooks, enabling reliable real-time data exchange and saving INR 20 lakh annually.
- Technologies:** Java, IBM MQ, Spring Boot, Docker, Kubernetes, AWS

Education

Aryabhatta Knowledge University, B.Tech in Computer Science and Engineering – Patna, India Aug 2018 – July 2022

- CGPA: 8.02 / 10
- Relevant Coursework:** Data Structures & Algorithms, Databases, Operating Systems, Computer Networks, Machine Learning, Advanced Algorithms, Information Retrieval

Certifications

[AWS Certified Cloud Practitioner — AWS](#)

[Full Stack Development — E&ICT Academy, IIT Kanpur](#)

[Relational Database Management System — E&ICT Academy, IIT Kanpur](#)

[Python — C-DAC ACTS](#)
